Case reference: CAM2849

Dear Requester

Thank you for your request for information dated 07/02/2022 about drug and alcohol rehabilitation placements. We have dealt with this under the Freedom of Information Act 2000.

Response

The council holds the information requested and the answers to your questions are as follows:

1.What is the number of drug and alcohol rehabilitation placements funded for adults by the local authority as at 1.1.22?

In 2019/20 - 36 Camden residents accessed residential treatment funded by the LA.
In 2020/21- 20 Camden residents accessed residential treatment funded by the LA. Please note this is lower than 2019/20 due to the impact of COVID on residential provider's ability to accept admissions.
So far in 2021/22 (up until Oct 21) 8 Camden residents have accessed residential treatment funded by the LA. Data for October onwards is currently unavailable.

2. *Are local authority drug and alcohol rehab placements means tested for each individual that come to the attention of the LA? If so what are the benchmarks used to assess whether an adult requires the local authorities support with funding a drug and alcohol rehabilitation placement.*

Each individual is financially assessed by the Assessments & Adult Social Care Income team within the council to ascertain if client contribution is required.

3. *Do the local authority fund drug and alcohol rehab placements for individuals if directed by the judicial system that it would better suit an offenders needs over incarceration?*

All referrals are considered including those either in or leaving the criminal justice system.

4. *What is the percentage increase in local authority funded drug and alcohol rehabilitation placements for the financial years of 2019/20 to 2020/21.*

The budget for residential treatment sits within Public Health. The budget for residential treatment is as follows:

2019-20 £400,000
2020-21 £400,000

5. What is the proportion of adults that pay for drug and alcohol rehabilitation placements privately that come to the local authorities attention?

We do not hold data on those who fund their residential treatment privately.

6. *Is there an internal panel consultation process to decide whether the local authority will fund a drug and alcohol rehabilitation placement? What are the parameters for approving or declining a placement?*

Yes there is a panel process. Each individual is assessed on their own personal circumstances, there is usually an expectation that individuals will have engaged with community services prior to referral for residential treatment.

7. Are drug and alcohol rehabilitation placements ultimately funded by the NHS once approved by the local authority?

As per response to question 4. The funding for the residential treatment comes from the local authorities Public Health budget.

8. Which department handles drug and alcohol rehabilitation issues for adults?

Public Health

9. Do you have a preferred provider list or approved framework of drug and alcohol rehabilitation clinics and/or treatment centres?

Yes we have framework contract of approved detox and residential rehab providers.

10. What are the requirements for becoming an approved provider or part of an approved framework?

This is managed through a tender process whereby providers need to provide evidence that they can provide services safely and effectively, and have appropriate clinical and therapeutic protocols and

standards. They have to be CQC registered, and be able to adhere to data collection and monitoring processes.

11. What was the average length of a drug and alcohol rehabilitation placement funded by the local authority for the financial year 2019/20. This varies and is agreed on an individual basis.

Most detox placements have an average length of 2 weeks, and an initial rehab placement will be 12 weeks. However, clients are able to request a further 12 weeks if they feel it is required, this is usually agreed at the 8 week review point.

12. What is the current cost of each individual drug and alcohol rehabilitation placement funded by the local authority for adults as at 1.1.22 and what is the length of each placement?

Costs of placements vary depending on client need. An average 12 week rehab stay would cost approx. £8,500, if the client presents with complex needs and requires more intensive support an average 12 week stay would be approx. £12,000. The average length of each placement varies, as per response to Q11, each placement starts with a 12 week stay. However, some people may not finish their 12 week placement and leave rehab earlier than anticipated. If this is the case, individuals are either supported by community services or an alternative rehab placements are explored with the individual.
